

CI-tronic™ auxiliary module

Type ACM-1

Features

- Full on monitoring of motor controllers
- Function monitoring of electronic contactors
- Dual voltage range, 230 V ac or 400-600 V ac, 50/60 Hz
- Relay output, 5A 250 V ac or 3A 24 V dc
- 22.5 mm module for DIN rail mounting
- LED status indication
- IP20 protection

Description

ACM-1 is an auxiliary module for monitoring the status of a connected motor controller or electronic contactor.

Typical application is control of bypass contactor for soft starters when full-on voltage is detected.

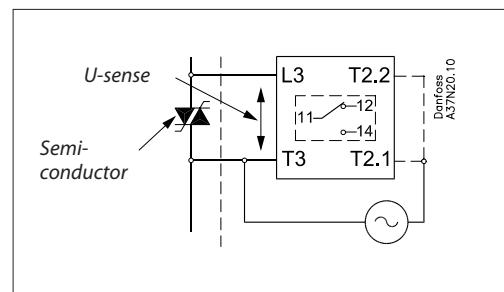

Ordering

	Operational voltage	Type	Code no.
	208 - 240 V ac 380 - 600 V ac	ACM-1	037N0085

Technical data
Specifications

Operational voltage	T2.1 - T3 T2.2 - T3	208 - 240 V ac, max. 10 VA 1.5 W 380 - 600 V ac, max. 35 VA 2.5 W
Relay output		5A 250 V ac (AC-22) or 3A 24 V dc (DC 22)
Control voltage		max. 250 V ac
Rated insulation voltage		Ui: 600 V
Rated impulse withstand voltage		Uiimp: 4 kV
Installation category		III
Degree of protection / pollution degree		IP 20/3

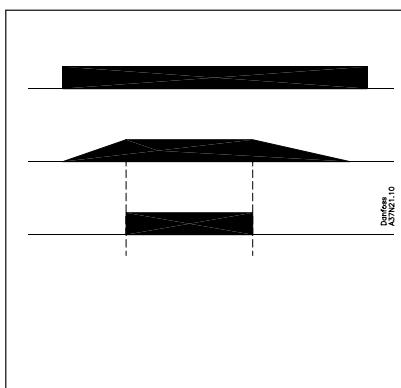

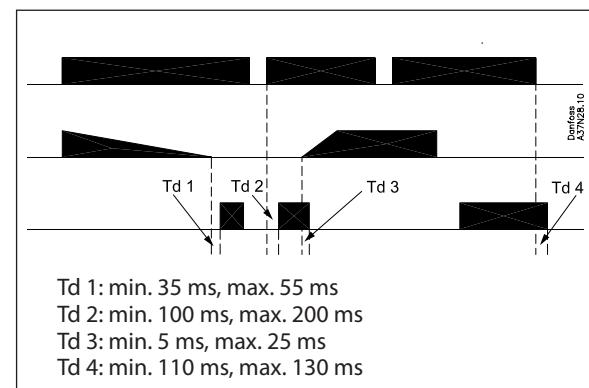

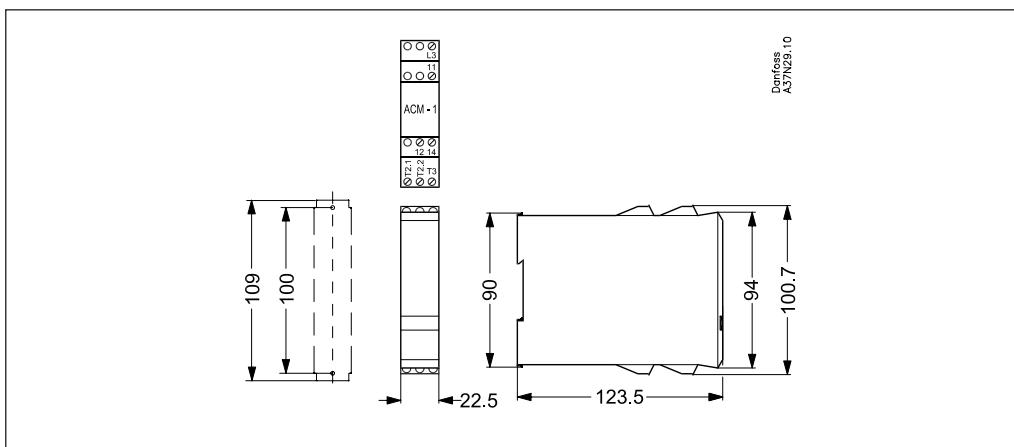

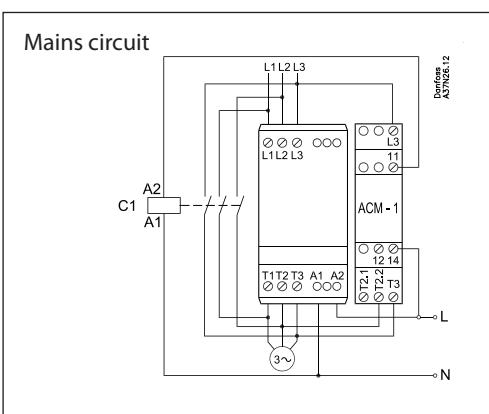

If the voltage across the semiconductor T3 and L3 is lower than 2 V ac, the relay output is activated. The relay output will open again when the sense voltage is higher than 2.5 V ac.

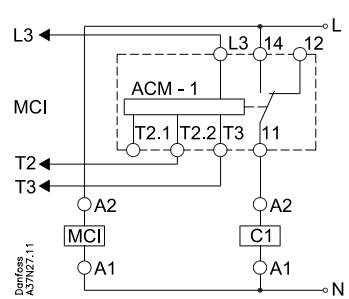

Supply voltage T2.x - T3

Motor voltage L3 - T3

Relay output 11 - 12/14

Functional diagram**Timing diagram****Dimensions****Application examples****Control of bypass contactor**

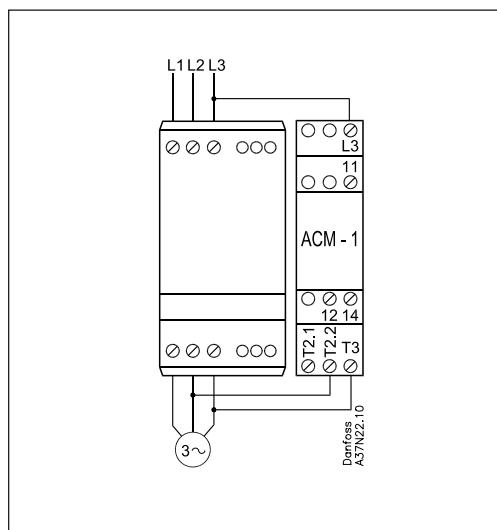

When the control signal A1-A2 is supplied to the soft starter ramp-up is initiated. When the ramp-time has elapsed the output relay in the ACM-1 will switch the bypass contactor on for limiting the power dissipation in the soft starter.

Control circuit

When the control voltage is switched off the bypass contactor will drop instantaneously before the semiconductors are switched off. In this application the contactor can be selected on the basis of the thermal current (AC-1).
